

CURRICULUM VITAE LEONARD ARIF SUTIONO

Jakarta, Indonesia | +62 82111464025 | leouwse@gmail.com | [Portofolio](#)

SUMMARY

Information Systems & Technology student at ITB focusing on AI/ML and Software Engineering. Experienced in building full-stack apps and AI solutions like tabular/image classification and RAG. Adaptable, fast learner, and looking for opportunities in AI Engineering, Data Science, or Software Engineering.

SKILLS & INTEREST

Skills:

- **Programming Languages:** Python, Go (Golang), TypeScript, JavaScript, C, C++, Java, HTML, CSS
- **Machine Learning & AI:** PyTorch, TensorFlow, Scikit-learn, Pandas, LLMs & Generative AI, Retrieval-Augmented Generation (RAG)
- **ML Competencies:** Tabular Classification & Regression, Image Classification
- **Web Development (Frameworks):** Next.js, Express.js, FastAPI, Gin
- **Databases & Cloud:** PostgreSQL, MySQL, Supabase, Firebase
- **Tools & Version Control:** Git, GitHub
- **Languages:** English, Indonesia

Interest: AI Engineering, Data Science, Software Engineering.

EDUCATION

Bandung Institute of Technology (ITB)

August 2023 - present

System and Technology Information

Latest GPA: 3.35

EXPERIENCES

UNIT ROBOTIKA ITB

September 2024 - Present

- **Web Development Contributor**, SEKURO 18 Website, Collaborated in designing and developing the official website for Sekolah URO (SEKURO) 18.
- **Treasurer**, Managing the financial operations of Unit Robotika ITB, including budgeting, expenditure tracking, and meticulous record-keeping.

INKUBATOR IT

September 2024 - March 2026

- **Tech Division Intern**, Selected as an intern in the Tech Division of Inkubator IT, where I improved a variety of technical tasks and problem-solving challenges.
- **Business Development Staff**, Contributed to the growth of Inkubator IT by identifying and engaging potential clients, developing outreach strategies, and promoting the organization's services.

COMPUTATIONAL THINKING PRACTICUM ASSISTANT

September 2024 - November 2024

- Served as a practicum assistant for the Computational Thinking course, a foundational programming subject using Python.

PROJECTS

- **Python Coding Learning Platform "CodeX"**, Built an interactive learning platform for Python programming using Python, React, Tailwind CSS, and Supabase. Designed the entire user interface and developed the backend infrastructure using Supabase for seamless data management.
- **Stardew Valley Clone "Stressdew Valley"**, Created a functional clone of the popular game "Stardew Valley" using Java and strict Object-Oriented Programming principles. Engineered the core game logic, systems, and backend architecture.
- **RAG Chatbot**, Developed a Retrieval-Augmented Generation (RAG) chatbot using Python Streamlit. Engineered the entire end-to-end pipeline, including text chunking, embedding generation using all-MiniLM-L6-v2, vector search optimization, and seamless LLM integration via the Google GenAI SDK.
- **SEKURO 18 Website**, Developed the official SEKURO 18 website for Unit Robotika ITB using Next.js, React, and Tailwind CSS, leading the UI/UX design to deliver an elegant and minimalist user experience.
- **AMR Classification Website "ResistDZ"**, Developed a web application to classify bacterial antibiotic resistance using React and Python. Responsible for the end-to-end UI design, backend development, and integrating the Machine Learning model.
