

CURRICULUM VITAE LEONARD ARIF SUTIONO

Jakarta, Indonesia | +62 82111464025 | leouwse@gmail.com

SUMMARY

An Information Systems and Technology student at the Bandung Institute of Technology (ITB) with a strong passion for engineering and problem-solving. Highly adaptable and a fast learner, I thrive in collaborative environments and tackling complex challenges. Eager to launch my career, I am driven to bring innovative solutions and make a meaningful impact in a dynamic organization.

EDUCATION

Bandung Institute of Technology (ITB)
System and Technology Information

August 2023 - present

EXPERIENCES

UNIT ROBOTIKA ITB

September 2024 - Present

- **Web Development Contributor**, SEKURO 18 Website, Collaborated in designing and developing the official website for Sekolah URO (SEKURO) 18.
- **Treasurer**, Managing the financial operations of Unit Robotika ITB, including budgeting, expenditure tracking, and meticulous record-keeping.

INKUBATOR IT

September 2024 - March 2026

- **Tech Division Intern**, Selected as an intern in the Tech Division of Inkubator IT, where I improved a variety of technical tasks and problem-solving challenges.
- **Business Development Staff**, Contributed to the growth of Inkubator IT by identifying and engaging potential clients, developing outreach strategies, and promoting the organization's services.

COMPUTATIONAL THINKING PRACTICUM ASSISTANT

September 2024 - November 2024

- Served as a practicum assistant for the Computational Thinking course, a foundational programming subject using Python.

PROJECTS

- **Python Coding Learning Platform**, Built an interactive learning platform for Python programming using Python, React, Tailwind CSS, and Supabase. Designed the entire user interface and developed the backend infrastructure using Supabase for seamless data management.
- **Stardew Valley Clone**, Created a functional clone of the popular game "Stardew Valley" using Java and strict Object-Oriented Programming principles. Engineered the core game logic, systems, and backend architecture.
- **Loan System Implementation**, Designed and implemented a comprehensive loan management system developed purely in Java, focusing on building a robust backend architecture and core business logic.
- **SEKURO 18 Website**, Developed the official SEKURO 18 website for Unit Robotika ITB using Next.js, React, and Tailwind CSS, leading the UI/UX design to deliver an elegant and minimalist user experience.
- **AMR Classification Website**, Developed a web application to classify bacterial antibiotic resistance using React and Python. Responsible for the end-to-end UI design, backend development, and integrating the Machine Learning model.
- **Spoiled Food Classification Website**, Developed a web application to classify food freshness using React, ExpressJS, and Supabase. Handled the full-stack process, including UI design, backend development, and AI model integration.

SKILLS & INTEREST

Skills: HTML, CSS, Javascript, Typescript, ReactJS, TailwindCSS, Python, C, C++, NodeJS, Java, Golang
Git, Github, Figma

Interest: AI Engineering, Software Engineering.

Language: English, Indonesia
